Overview

SCS-Visitor Check is a professional visitor management solution, designed to improve security, streamline visitor processing and provide real-time visibility of all visitors on site. The solution supports reception-based registration, self-enrolment tablets and handheld ID scanners for corporate, industrial, commercial and security estate environments.

Key Benefits

- Multi-Channel Host Notification and Approval
- Faster visitor processing
- Convenient visitor experience
- Improved security and compliance
- Real-time visibility of visitors on site
- Visitor Self-Enrolment Tablets with ID scanning
- Handheld ID scanners
- Reception-Assisted Registration
- Automatic access control integration for gate, barrier and door control

System Architecture

Core Features

- Seamless integration with Softcon's Softwin3 Access Control platforms
 - ✓ Create and manage visitor records in Softwin3.
 - ✓ ID Blocklist checking option.
- Scan Driver's licences and ID cards of:
 - ✓ South Africa
 - ✓ Namibia
 - ✓ Zimbabwe
- Scan Passports / Barcodes
- Mandatory visitor photo capture creates a complete audit trail
- Mandatory vehicle licence verification improves security and audit compliance
- Incident photos to record events
- Devices configurable for Entry or Exit mode
- Verify entry and exit
 - ✓ Compare entry vehicle registration with exit vehicle registration
 - ✓ Vehicle numberplate entry and exit check
- Automated barrier / gate control on successful verification / host approval
- Configurable event trigger buttons to activate:
 - ✓ Alarms, open gates, switch lights, etc.
- View photos on Softwin3 client applications
- Badge Printing
- On-Premises Data Storage – No Cloud Dependency
- Transaction and audit log reporting
- Secure cloud-based software updates

Host Notifications / Approval

- Email and SMS notifications
- Voice message call to host mobile
 - ✓ Approval or rejection via host mobile
 - ✓ Call back reception or device

Scan to listen to a live host notification demonstration

Planned Enhancements

Currently under development

- Visitor pre-registration application
 - ✓ QR code scanning for pre-registered visitors
- Facial recognition
- Number plate recognition
